

Pain is considered the fifth vital sign along with blood pressure, pulse, temperature and respiration. Physicians are meant to evaluate pain.

Pain is a symptom that can be related to various medical conditions ranging from simple to serious. Seeking and treating the source of pain is our goal.

Some pain conditions that we treat successfully

- Bulging Discs
- Pinch Nerve Pain
- Failed Back or neck Syndrome
- Fibromyalgia
- Neck Pain
- Shoulder Pain
- Arm & Hand Pain
- Back Pain
- Hip Pain
- Knee Pain
- Leg Pain
- Shingle Pain
- Headaches
- Facial Pain

Some procedures offered

Epidural Steroid Injections

This procedure is a common treatment option that can relief low back/ neck pain, and leg /arm pain associated with bulging discs and pinched nerves, by reducing swelling and irritation. At times the injection alone is sufficient to provide relief.

Medial Branch Nerve Block

This Procedure may bring relief, when neck/back pain is caused by inflamed (irritated & swollen)small joints of the spine.

Discography

Discography is a simple diagnostic procedure that confirms or denies the bulging disc(s) as a source of back or neck pain. It may determine the level of the bulging disc and pinched nerve, even if spine MRI is negative .

Disc Decompression Procedures

Vax-D Therapy is a non-invasive spinal decompression treatment that may relieve back pain associated with bulging discs and pinched nerves.

For more information, please visit our website:

Plasma Disc Decompression (PDD)

Minimally invasive surgical treatment for bulging discs and pinched nerve pain, performed in and out patient setting without hospital stay or surgical incision, with quick recovery and less pain, compared to Conventional Back Surgery

Spinal Cord Stimulation

Spinal cord stimulator replaces the pinched nerve pain with a pleasant feeling, giving patients better quality of life and functionality. It may help with severe sciatic pain or numbness, in patients who are not surgical candidates or had failed back surgery.

Minimally Invasive Spinal Fusion (TruFUSE)

TruFUSE has revolutionized how back pain is treated. This procedure eliminates the "cause" of the pain without drugs, screws, rods or major surgery. Patients who undergo the TruFUSE procedure experience more complete recovery and more active lifestyle.
